The Composite Door Collection

door-stop
INTERNATIONAL
Don’t compromise, go composite

We don’t believe in compromising on quality. We’ve brought together materials to give you the very best in strength, easy maintenance, security, and weather resistance. Oh – and great looks as well.

Behind that rather scientific-sounding name, you’ll find the latest technology and design in doors. When you’re indoors you’ll enjoy loads of style, strength and security. Our composite door is thick – but it’s also very smart. In fact it’s 44mm thick (compare that to conventional PVC panel doors at 28mm). Its powerful too, its super-strong structural frame and up-to-the-minute hardware makes our composite door even more secure. Its glass reinforced plastic finish means you’ll be secure in all weathers and enjoying great looks for years to come.
The Contemporary Range

A front door speaks volumes about a property. Now you can make even more of a statement with our range of contemporary furniture suites that can transform your door into a real property feature.

Choose from the Long Bar suite, the ultra-modern Square suite, the elegant Bow Handle suite, our Handleless option, or the timeless Classic suite.

These hardware choices are undeniably elegant, but also incredibly hard wearing. Crafted from stainless steel, they will endure the demands of the British weather and everyday use season after season.

See Page 64 for the full contemporary furniture guide.
Unless you choose handles on both sides (available on Long Bar, Square Bar and Bow handles) your contemporary range door will feature a pull escutcheon on the inside.

Satin Glass

Due to popular demand, we’ve added Satin Glass to our ‘pattern glass’ range. It’s the perfect door glazing option for modern and contemporary properties.
Black-brown doors

We’ve created this new door colour, to better match the in-demand black brown foiled outer frame, as pictured here. This colour is exclusive to Genuine Door-Stop doors.

Planet friendly

Door-Stop doors were the first ever to be certified with an energy rating, and a bespoke energy certificate is issued with every door we make. Whilst the requirement in the UK is to be G rated or better,* any door we make can be configured to achieve a rating between A++ and D. The energy saving you feel can be enhanced further with the thermal glass upgrade option.

*Information from HAPM (Housing Association Provident Mutual) and BRE (Building Research Establishment)
Yale TS007 3-star security

Yale’s Superior cylinder and Stainless Steel handle combination is accredited with the coveted TS007 3-star BSI Kitemark - the most secure available for composite doors and locks.

The TS007 1-star cylinder and can be combined with the TS007 2-star armoured Platinum handle, giving the door/lock combination the 3-star standard. The cylinder is anti-bump, drill, pick, tamper, torque and force resistant. It will withstand attempts to saw, wrench, corrode or even burn it out.

Having a door fitted will not always guarantee the latest security. Burglars are pretty good at finding the weak points, but with the ERA Vectis cylinder-free lock - the door is so difficult to break in to, we actually guarantee it won’t happen.

Register your door with the form in your homeowner guide or online at www.door-stop-doors.co.uk within 28 days of installation. Then in the unlikely event you have a break-in because the door lock has been broken, we’ll replace your door FREE along with £500 compensation.

For more information, or to register your Door-Stop door visit www.door-stop-doors.co.uk/guarantee
Police certified

If anyone knows about security, it’s the Police. Our Secured by Design option meets their national standard for safer homes. It’s not only Police-approved - it’s recognised by many insurance companies. So as well as enjoying an added sense of safety, you could get a discount on your home insurance cover, too.

Colour coding

The weather bar that sits at the bottom of the door works hard to keep water outside. Door-Stop’s colour coded range of weather bars are fitted to every door, and seamlessly blend into the appearance of your new door.

Yale Keyfree

We are all used to unlocking our cars with a remote control, now you can do the same thing with your front door. Door-Stop were the first to offer Yale’s Keyfree, giving convenience by allowing access without a key. Whether, like with your car, you use one of the remote controls or enter your own personal code into the built-in keypad, Yale Keyfree couldn’t be easier to use. No more lost keys, no more rummaging in your bag and no more cutting keys for visitors.
Don’t replace - reglaze

With our patented reglazable cassette system, changing the glass does not mean replacing the door - for whatever reason. We’ve made it easy to reglaze without any impact on the door or the cassette. In the event of the unexpected, or the glass units simply break down and go misty. So no drama, no fuss and no brand new door required.

Our cassette is also colour injection moulded to match your door – and fully accredited to tough BS:EN 6375 and PAS24 security standards

Lockmaster by Yale

Designed, developed and tested to deliver the very highest levels of performance for security and ease of use.

It’s not hard to see why this has been one of the most popular multipoint locks in the UK for the last 15 years. The British made Lockmaster features a combination of hooks and anti-lift bolts. It’s high security and peace of mind from the makers of the world’s favourite lock.

Hurricane tested

The average rainfall in the UK is between 700mm a year in East Anglia and 3,000mm a year in the Scottish Highlands.* So we’ve designed our doors to be fully protected against extreme weather conditions.

Door-Stop doors are tested in a pressurized chamber to simulate gusting winds starting at 63 miles an hour and up to 80 miles an hour - that’s stronger than a hurricane. Then they are tested further by spraying two litres of water every minute directly at the door in their test chamber - that’s a serious amount of rain. So even when it’s cats and dogs out there, your door will keep you snug and dry.

*Meteorological Office Statistics

Solid grids

The Door-Stop 2 panel 1 grid door design can feature a glazed unit with a solid internal grid. So when your eye glances across the glazed panel you don’t see the inside of a glazing cassette, you see the effect that you would get if the door had 9 separate pieces of glass.

See Page 65 for larger photos of our Glass Patterns
GU Slam Lock

All Door-Stop doors fitted with contemporary hardware are supplied with the GU ‘Slam Lock’. This lock features bolts (see above) rather than hooks, that engage the moment the door is closed.

To lock the door from the inside the user turns the key or, if it’s been fitted, the thumbturn. From the outside the door can only be opened with a key.

See Page 64 for a full contemporary furniture guide.

Beware imposters

There are many unique features on a Genuine Door-Stop door that you won’t find elsewhere. With all the unique features we offer, it’s important to know that you’ve got the real thing. All of Door-Stop doors carry an official stamp on the hinge edge near the bottom of the door.

Edged detail

Every sightline of a Door-Stop door is considered. Even for the edge that spends nearly all of its life concealed. On the hinge edge of every door we apply a grained trim, and then we countersink the hinges to make a perfect flush finish.
All the information in this brochure is provided for guidance only and is given in good faith, but without warranty or guarantee of any kind, whether implied or expressed.

Our policy is to continually improve products, therefore methods, materials and changes of specification may be made from time to time without prior notice.

Colour samples printed in this publication should only be used as a guide and are as accurate as our printing process allows.
